# Anaconda 설치

# Anaconda 설치

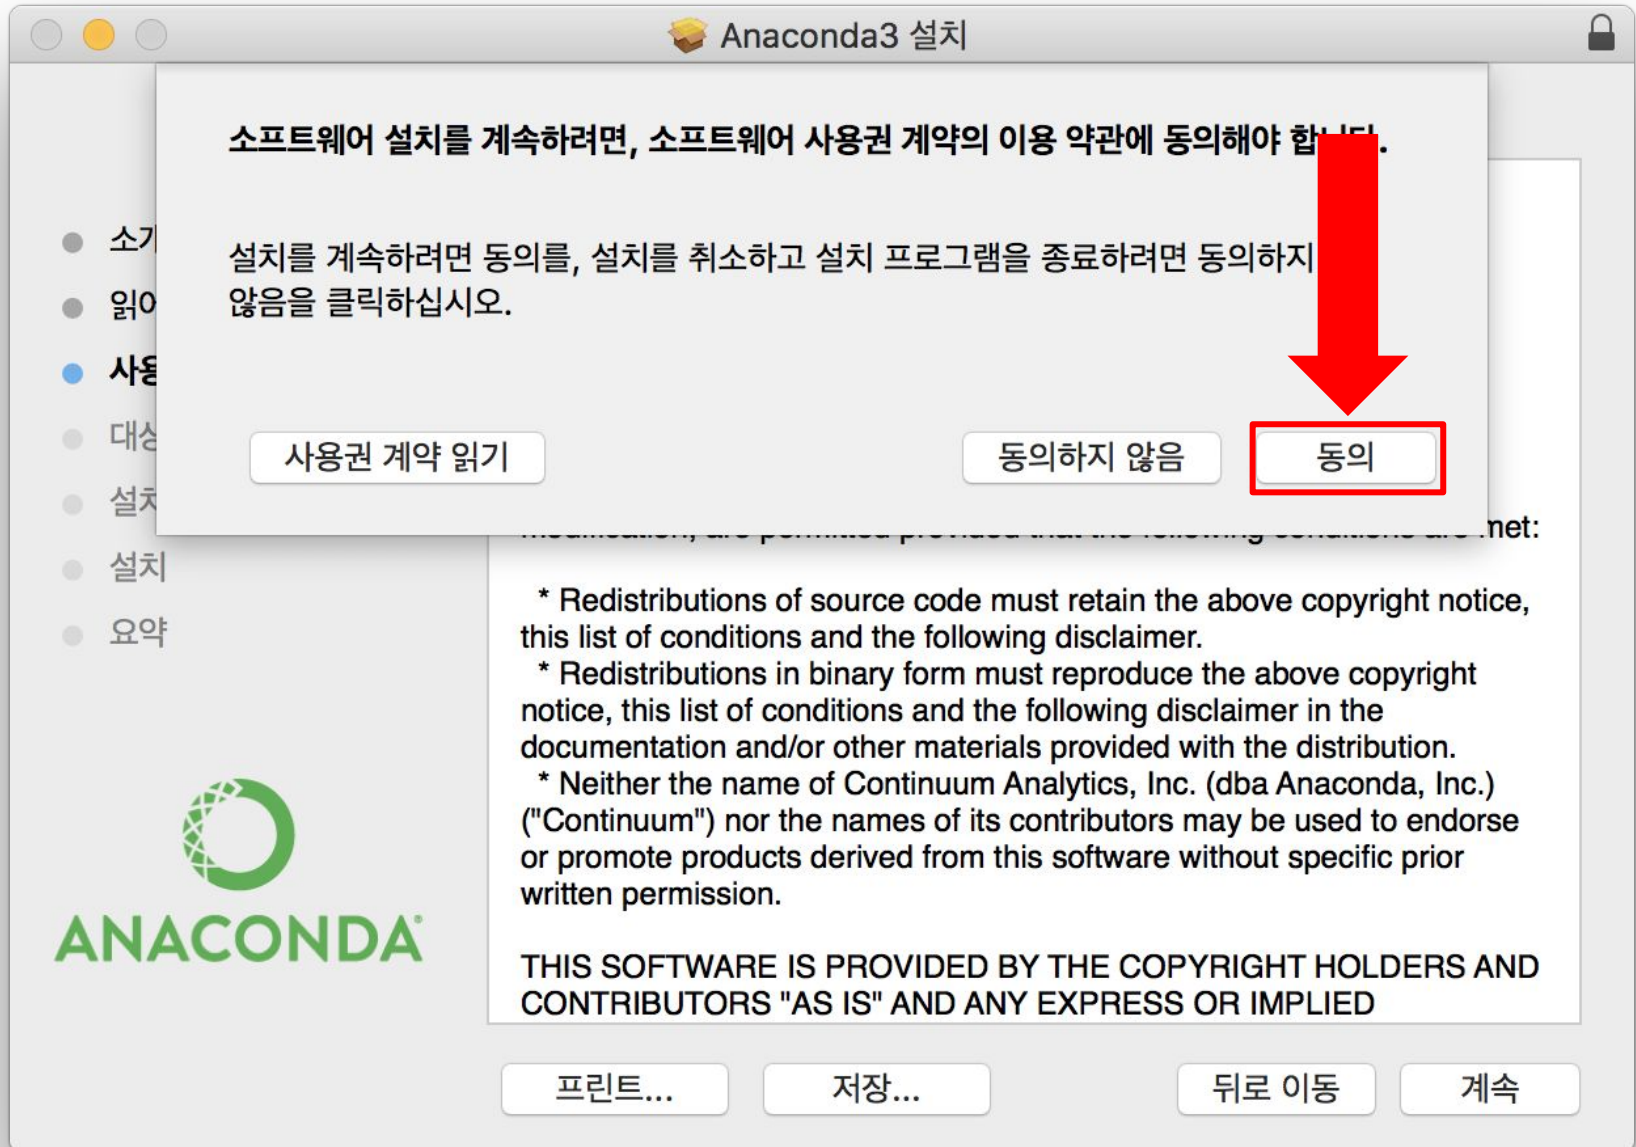

# Anaconda 설치

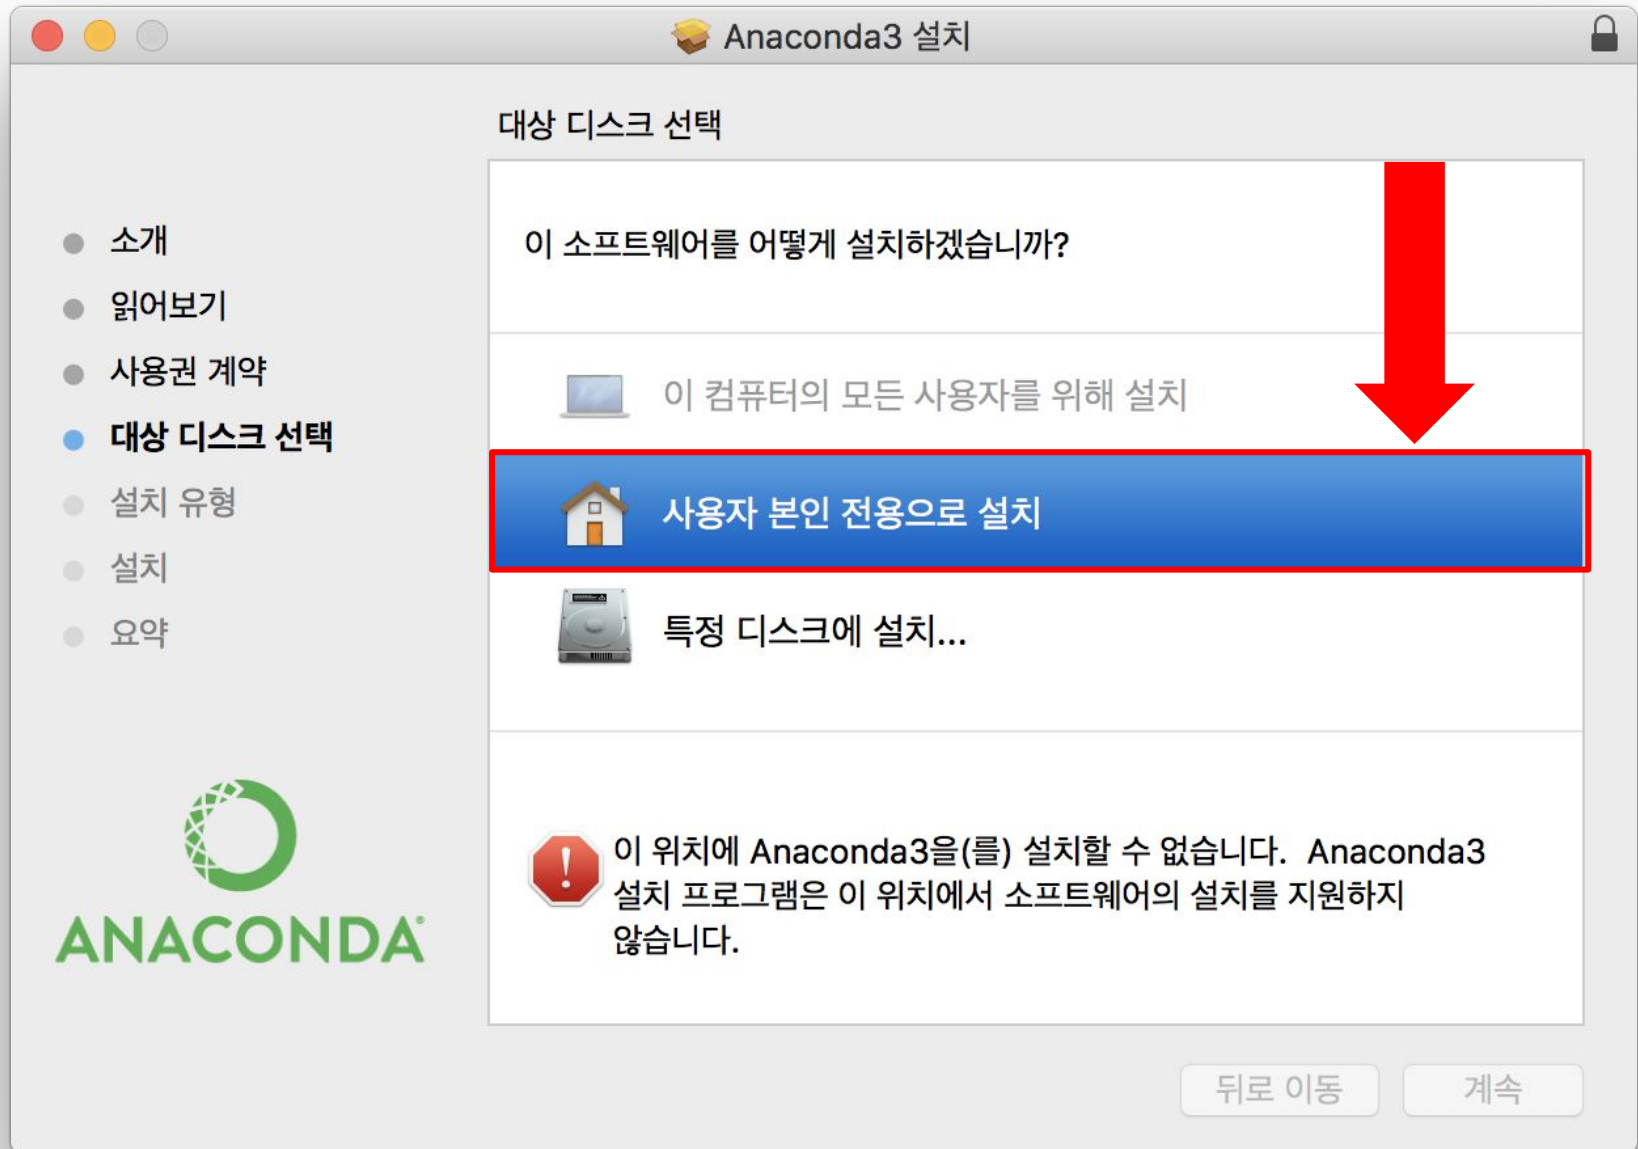

# Anaconda 설치

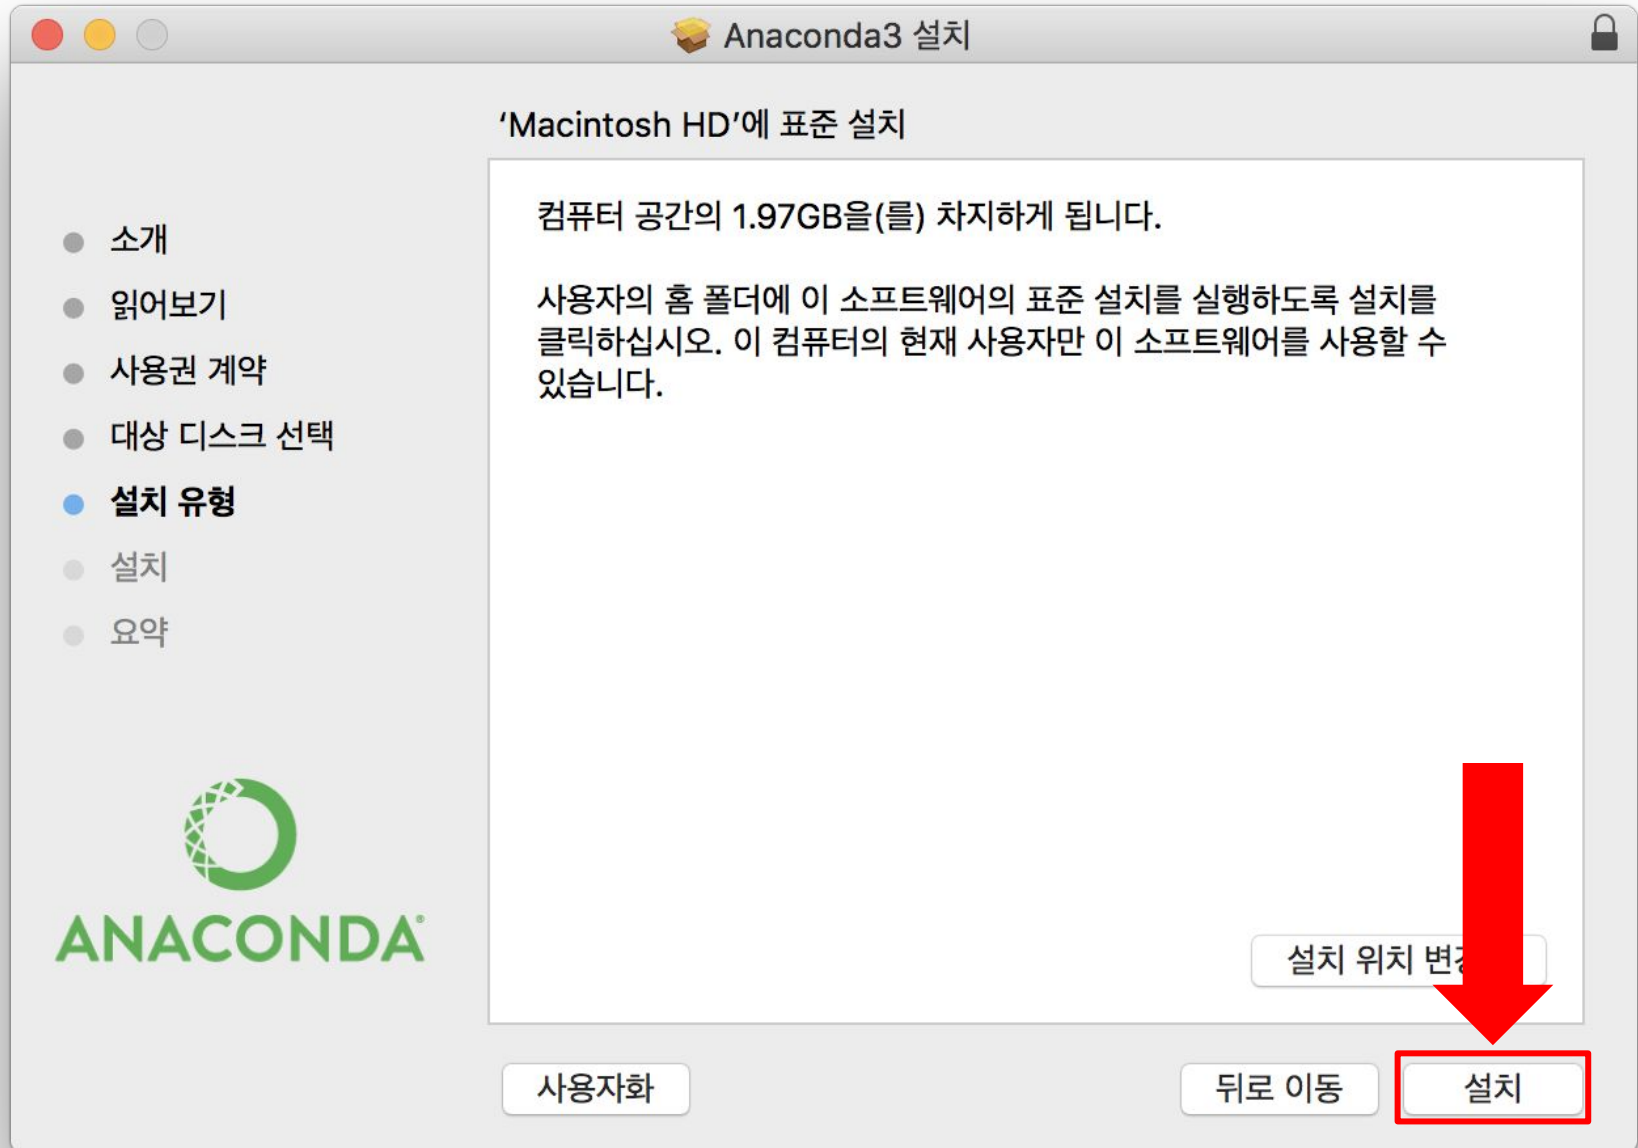

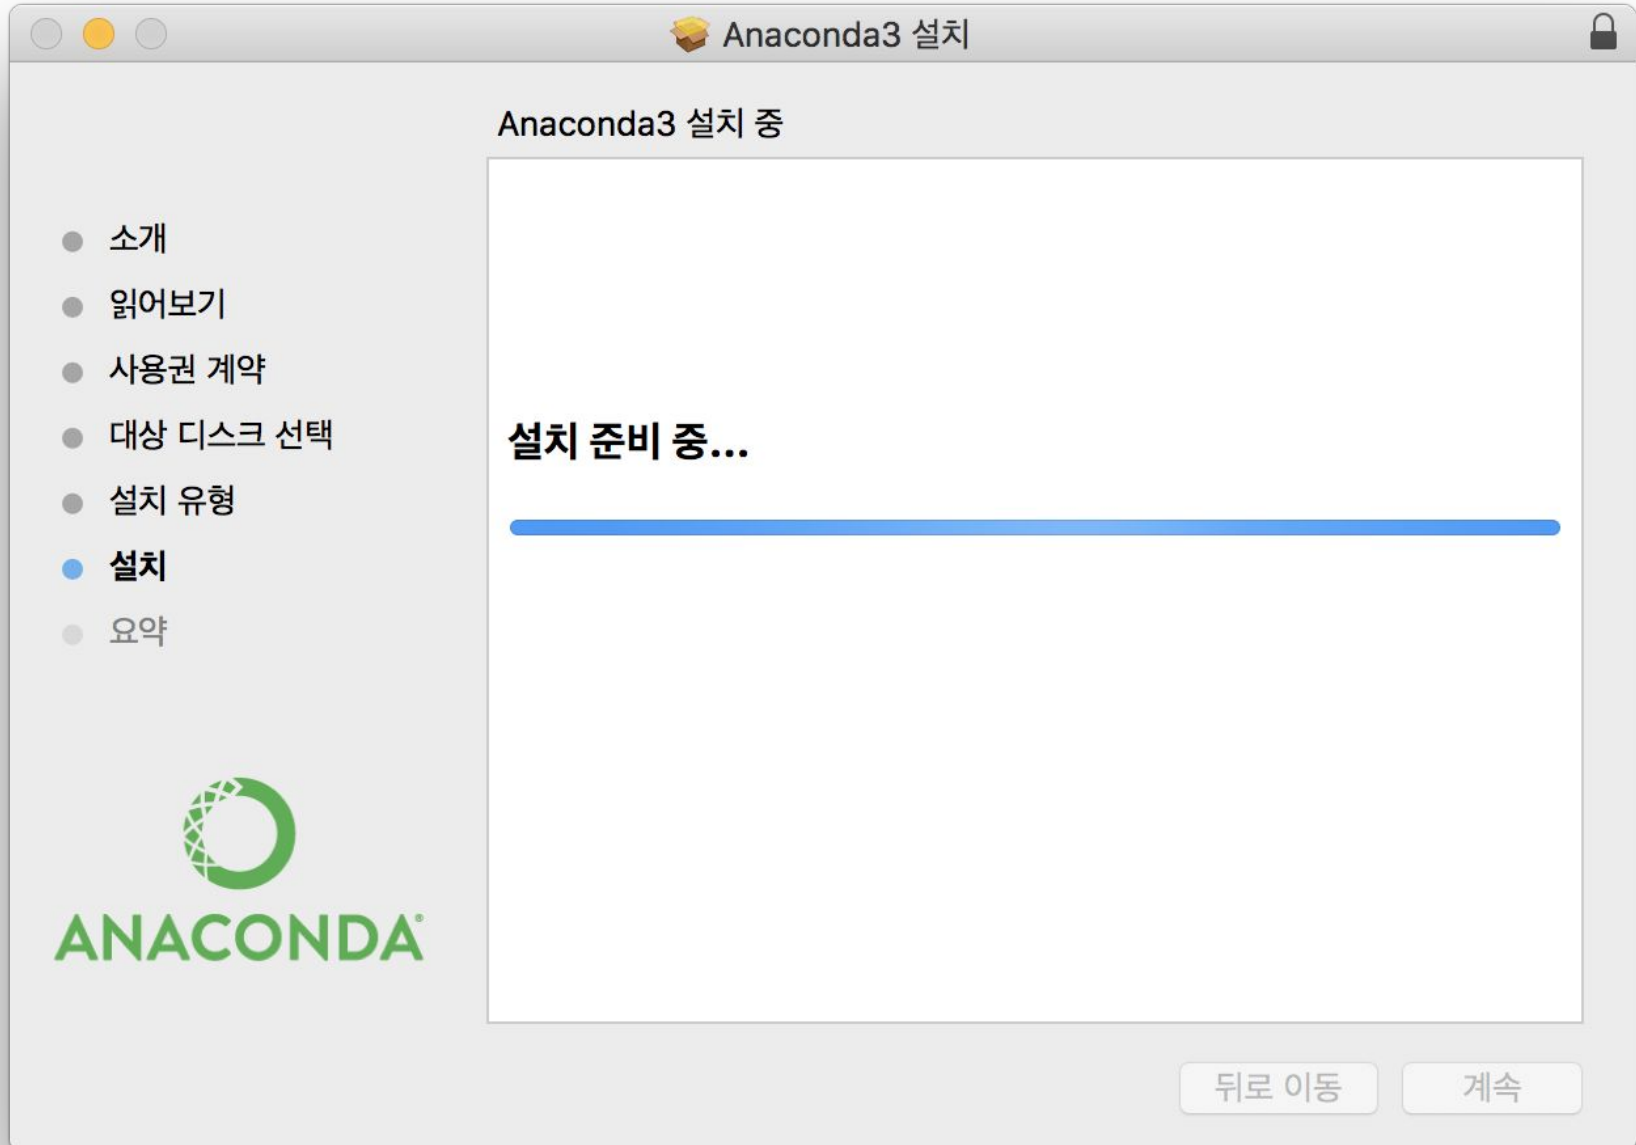

# Anaconda 설치

# Anaconda 설치

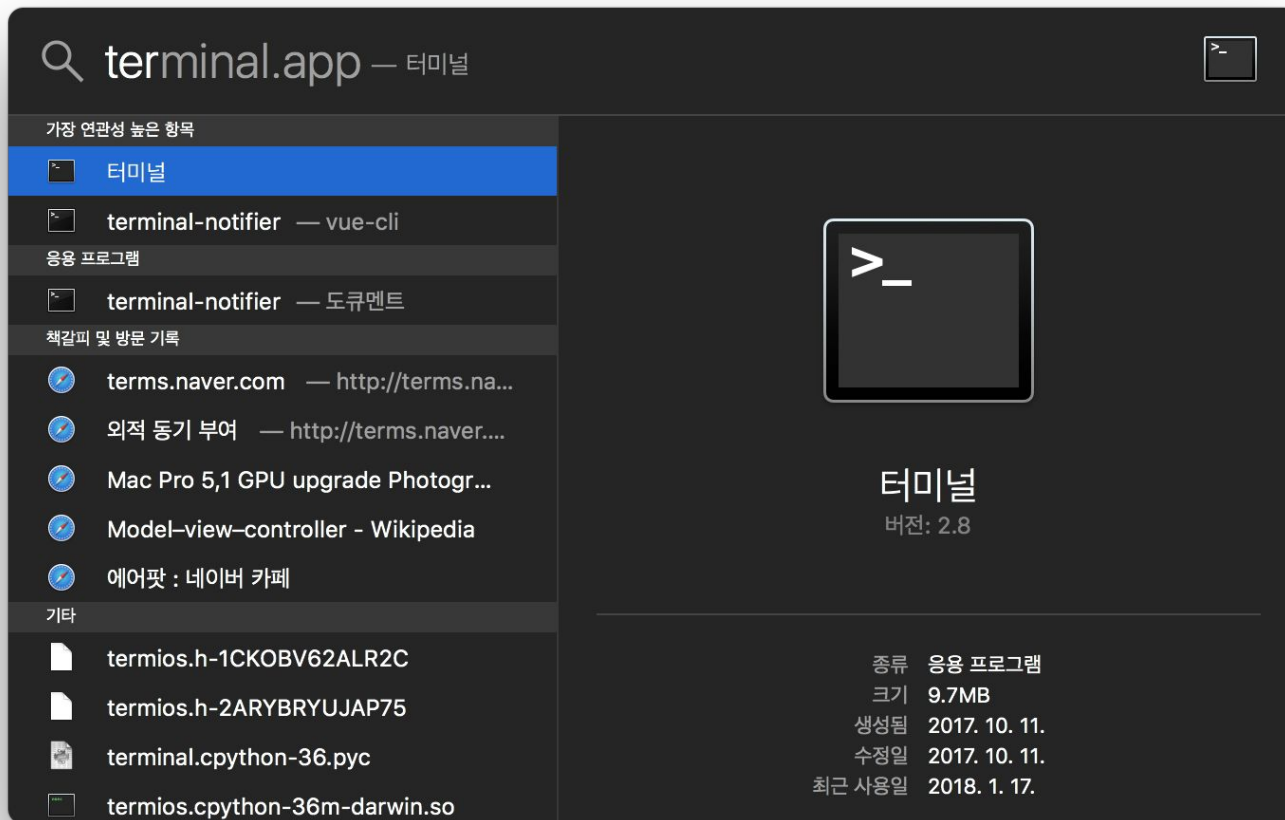

# Anaconda 설치

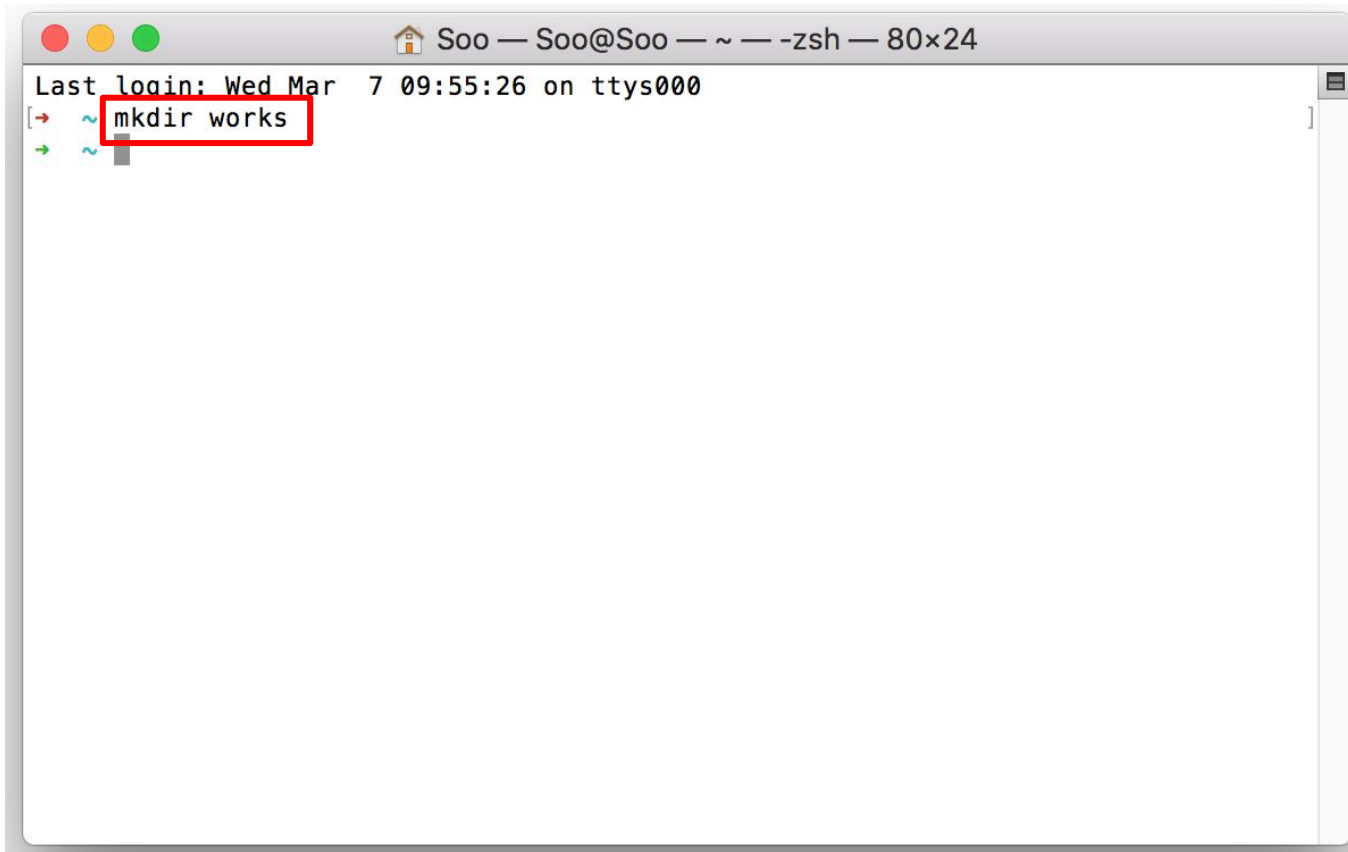

# 터미널 실행

Control + 스페이스바 > **terminal.app** 혹은 **터미널** 입력후 실행

# 작업 디렉토리 설정

- 원하는 곳에 작업 디렉토리 만들기  
(혹은 Finder 에서 작업 디렉토리 생성하기)  
예시) home 디렉토리(~) 에 works 폴더 생성
- 커맨드: **mkdir** [디렉토리 (폴더) 이름]

```
Soo — Soo@Soo — ~ — -zsh — 80x24
Last login: Wed Mar  7 09:55:26 on ttys000
[~] mkdir works
```

# 자료 저장

다운 받은 자료를 설정한 디렉토리에 저장

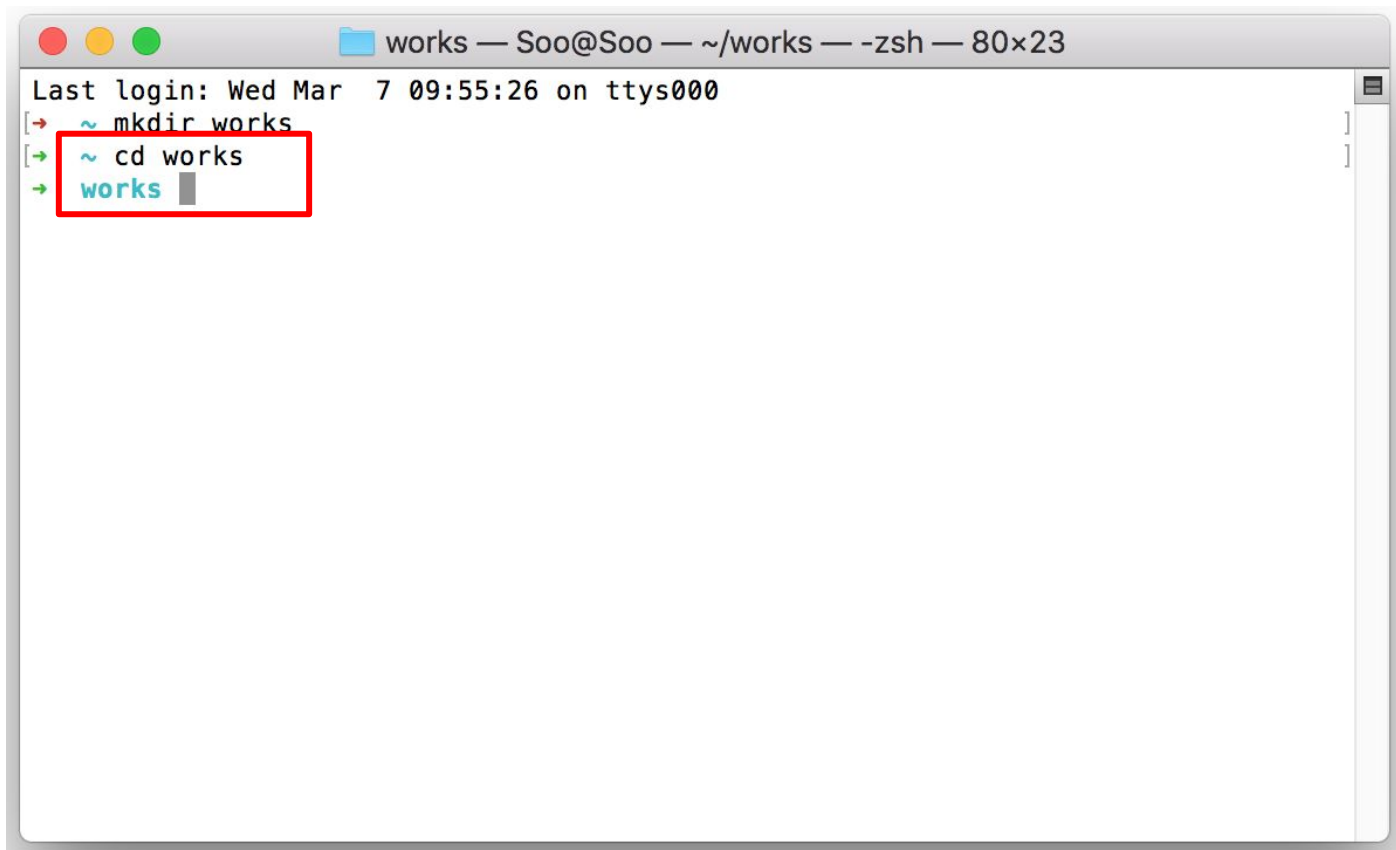

# Jupyter Notebook 실행

설정한 디렉토리(폴더)에 접속하기

- 커맨드: **cd** [디렉토리 (폴더) 이름]

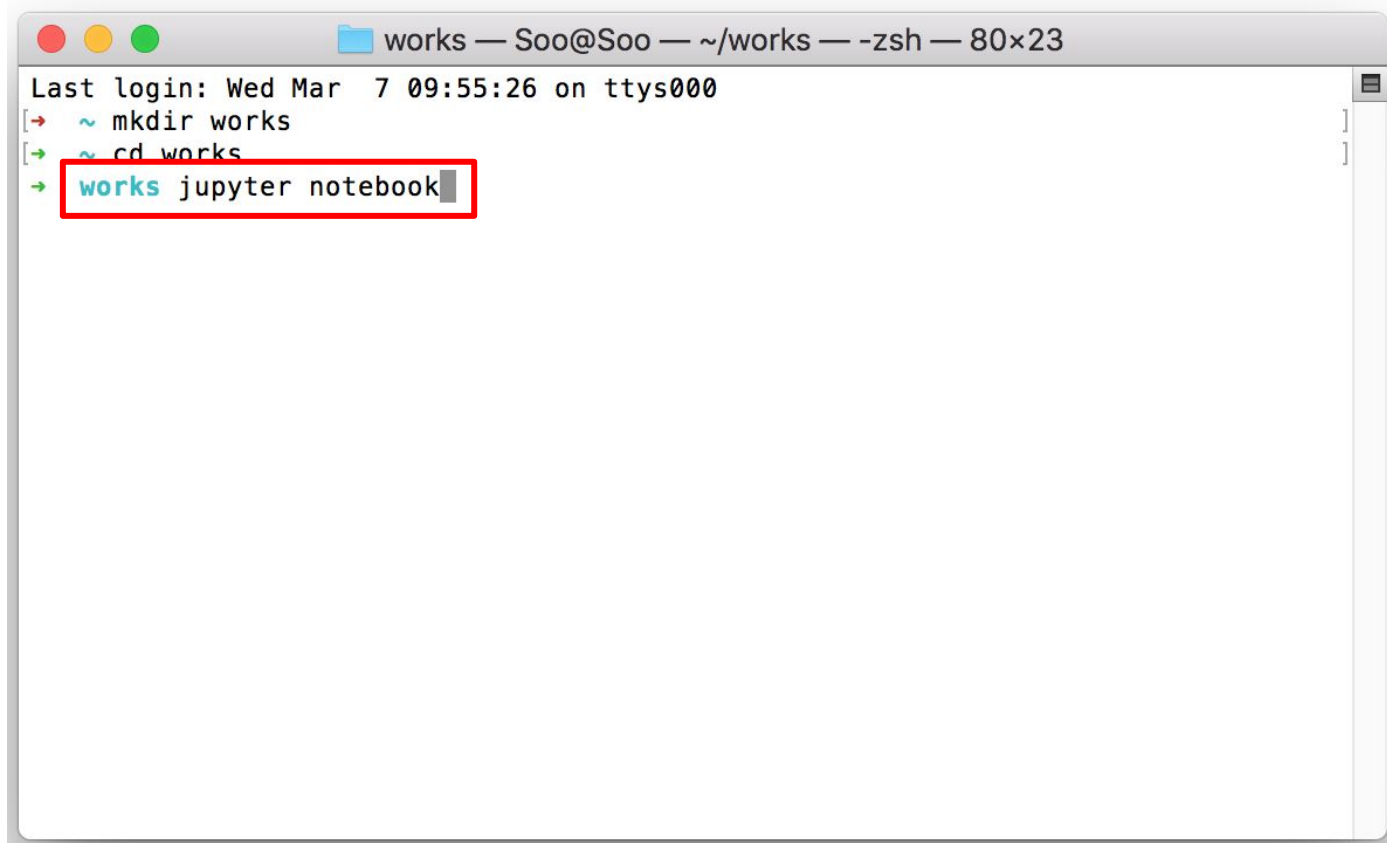

```
works — Soo@Soo — ~/works — zsh — 80x23
Last login: Wed Mar  7 09:55:26 on ttys000
[→ ~ mkdir works
[→ ~ cd works
→ works
```

A terminal window titled "works — Soo@Soo — ~/works — zsh — 80x23". The window shows the output of a login session: "Last login: Wed Mar 7 09:55:26 on ttys000". Below this, three lines of commands are shown, each preceded by a green arrow: "[→ ~ mkdir works", "[→ ~ cd works", and "→ works". The text "cd works" and the prompt "works" are highlighted with a red rectangular box.

# Jupyter Notebook 실행

**jupyter notebook** 타이핑 후 엔터로 실행

```
works — Soo@Soo — ~/works — -zsh — 80x23
Last login: Wed Mar  7 09:55:26 on ttys000
[→ ~ mkdir works
[→ ~ cd works
[→ works jupyter notebook
```

A terminal window titled "works — Soo@Soo — ~/works — -zsh — 80x23". The window shows the following commands and output:

- Last login: Wed Mar 7 09:55:26 on ttys000
- [→ ~ mkdir works
- [→ ~ cd works
- [→ works jupyter notebook

The command "jupyter notebook" is highlighted with a red box.

# Jupyter Notebook 실행

# Jupyter Notebook 실행

**Command Mode** : 셀 편집 불가 상태

A screenshot of a Jupyter Notebook cell in Command Mode. The cell is represented by a light gray rectangular box with a thin blue border on the left side. Inside the box, the text 'In [ ]:' is followed by a large empty space for code.

In [ ]:

**Edit Mode** : 셀 편집 가능 상태

A screenshot of a Jupyter Notebook cell in Edit Mode. The cell is represented by a light gray rectangular box with a thin green border. Inside the box, the text 'In [ ]:' is followed by a vertical cursor line, indicating that the cell is ready for editing.

In [ ]: |

Command Mode 에서 회색 부분을 **클릭**하면 Edit Mode 전환  
Edit Mode 에서 **ESC** 누르면 Command Mode 전환

# Jupyter Notebook 실행

## REPL(Read-Eval-Print Loop) 방식

코드를 작성하며 명령어를 한줄씩 입력하며 실행 상황을 지켜보는 방식

코드 작성 후, **Shift + Enter** 로 결과 값 출력

```
In [ ]: print("Hello! Edwith!")
```

실행시 숫자로 몇 번째 실행인지 나옴

```
In [1]: print("Hello! Edwith.")
```

```
Hello! Edwith.
```

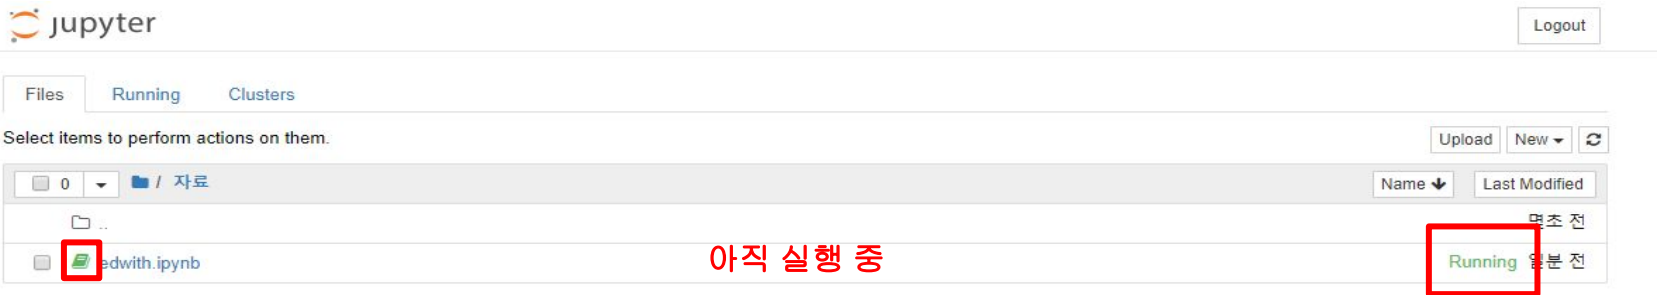

결과 값 출력 위치

```
In [ ]:
```

# Jupyter Notebook 실행

쥬피터 노트북 끄기:

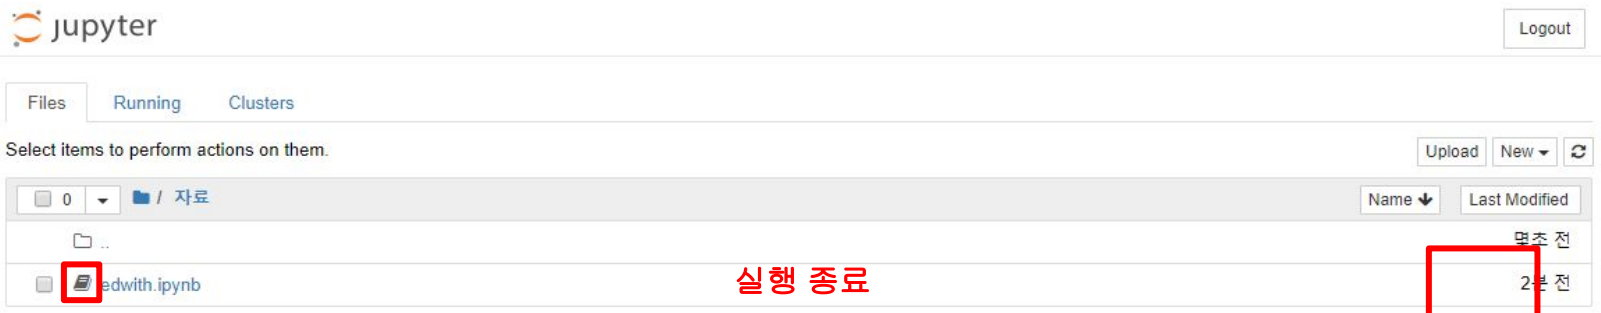

창만 끄게 되면 **Backend**에서 계속 프로그램이 실행되고 있음  
따라서, 직접 **Shutdown**을 해줘야함

The screenshot shows the Jupyter Notebook interface with the 'Running' tab selected. A file named 'edwith.ipynb' is listed in the file browser. The file's status is 'Running', indicated by a green icon and the text 'Running' in green. A red box highlights the 'Running' status text. The text '아직 실행 중' (Still running) is written in red next to the file name.

The screenshot shows the Jupyter Notebook interface with the 'Running' tab selected. A file named 'edwith.ipynb' is listed in the file browser. The file's status is 'Running', indicated by a green icon and the text 'Running' in green. A red box highlights the 'Shutdown' button in the action bar. The text '체크하고 클릭' (Check and click) is written in red next to the file name.

The screenshot shows the Jupyter Notebook interface with the 'Running' tab selected. A file named 'edwith.ipynb' is listed in the file browser. The file's status is 'Completed', indicated by a grey icon and the text 'Completed' in grey. A red box highlights the 'Completed' status text. The text '실행 종료' (Execution completed) is written in red next to the file name.
